

GLUE SPREADER ACU-PUR

ACU-PUR is the highest precision roller coater for the application of liquid polyurethane adhesives and polyols.

Standard configuration

- Top side glue application
- Independent motor on each roller
- Controlled pneumatic glue sealing system
- Temperature of adhesive conditioned and controlled
- Data monitoring and diagnostic with digital display
- Motorized thickness adjustment
- Safety opening among rollers

Added value

High precision glue application
Designed to work continuously 24/7
Heavy duty construction
Highest safety cleaning

Thickness

Up to 150 mm

Width

1,600 mm
1,900 mm
2,100 mm

Main options

- Double sided spreading
- Automatic glue dosing
- "Active" glue distribution
- Programmed glue application
- Remote servicing / communication devices
- Glue Feeding and Conditioning devices
- Lateral removal from production line for maintenance (wheel + track)

Other options available upon request.
